# Core Update
## V1 Progress

# Core Q1 2020

- **V1 build is approved by Apple** 🎉
  - We submitted a develop build of the app w/o 13/1/2020
  - The app was approved within 2 hours
  - We are optimistic that the official release build will also be approved
- **We will distribute a dogfooding build to CCs & ambassadors**
  - Look out for instructions today, 20/1/2020
  - Help us to kick the tires and report issues that must be fixed for release
- **V1 should be available in February 2020**
  - We were slowed down by holidays, but foresee no new blockers
  - Marketing strategy has been reduced to our usual channels, no media
- **Focus after v1 shifts to chat improvements, Waku integration & responding to user feedback**
  - The list of chat priorities is here
  - Specs for each new feature are here
  - Waku updates are available here
  - Other improvements will happen in response to user feedback to V1

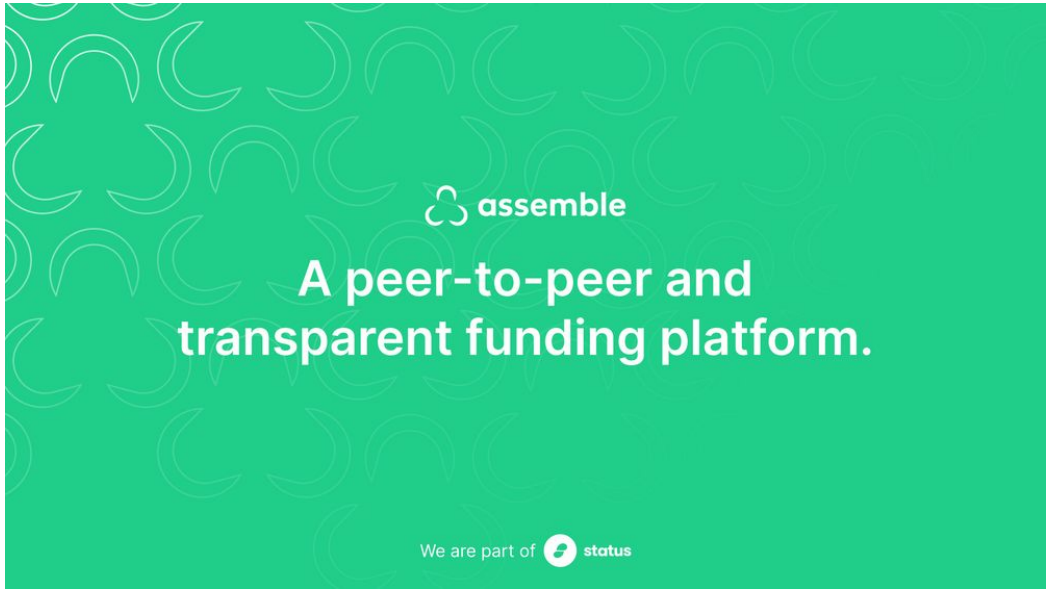
# Security and Infrastructure Updates

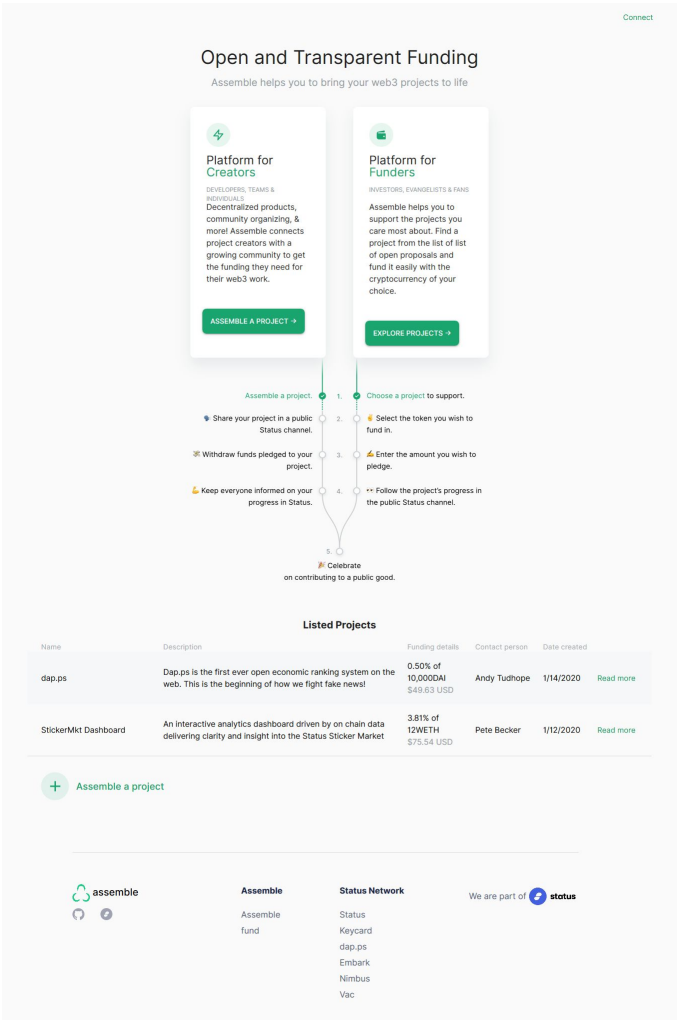
# Infrastructure Updates

- **Multiple improvements for https://dap.ps/**
  - Fixed slow load times for (#53)
  - Upgrade to Embark `4.2.1` (#61)
  - Fixed loading issues on iOS (#16)
  - Fixed mix of image URLs in DB (#55 #66)
  - Fixed caching issues with `/metadata/all` (#17 #68)
  - Improvements to IPFS usage (#2)
  - Added `raw` subdomains for non CDN debugging
- **Deployment of `eth.prod` fleet for V1** (infra-eth-cluster#9515e7c4)
  - https://fleets.status.im/ now also includes Rendezvous
- **Deployment of https://assemble.fund/** (liquid-funding#112)
- **Deployment of https://contacts.status.im/** (infra-misc#31)
- **Deployment of https://embarklabs.io/ and subdomains**
- **Stable IPFS cluster at https://ipfs.status.im/** (infra-ipfs#3)
  - Ongoing work on pinning Status content (infra-ipfs#2)
- **Major Nix refactor** (status-react#9605)
- **Nix Cache performance improvements with CloudFlare CDN**
- **Multiple improvements to History node setup** (status-go#1755)
  - https://github.com/status-im/status-go/blob/develop/MAILSERVER.md
- **Several Software Upgrades**
  - Docker: 18.09 > 19.03
  - Grafana: 6.0.2 > 6.5.1
  - Jenkins: 2.204 > 2.211
  - Prometheus: 2.9.2 > 2.15.2
  - XCode: 11.2.1 > 11.3.1
  - Matterbridge: 1.16.1 > 1.16.3
  - SourceCred: 0.3.0 > 0.4.1
  - Consul: 1.6.0 > 1.6.2
  - Nix: 2.3 > 2.3.2
  - Multiple Terraform Modules
- **MatterBridge adjustments**
  - Community server bridges
  - **#block-science** Slack bridge
  - Staged V1 messaging upgrade

assemble

status





We have up to $50k in funding for core contributors and ambassadors, so if you'd like to pitch a project, you can do so now at assemble.fund

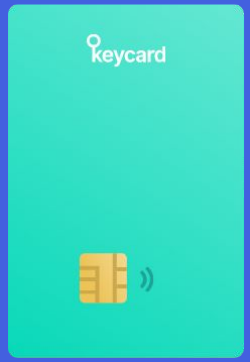
# Keycard update



status

# Keycard update

- **Integration within Status**
  - Card tearing issue #9764
  - Until this is resolved, Keycard integration in Status v1 is disabled
  - Path to solve it
    - Find the root cause within the card
      - Software tearing protection ?
      - Hardware (read/writes in eeprom) issues under certain physical circumstances ?
    - Hardware replacement solutions
      - Currently testing JCOP4 from NXP
      - Getting samples from Gemalto
      - Check if Infineon, Idemia have products solving this issue

- **Payment network**
  - Iterative approach for the proof of concept
  - PoC v1 defined here
  - PoCv1 ready in February, currently fine tuning estimation of effort for the work remaining.

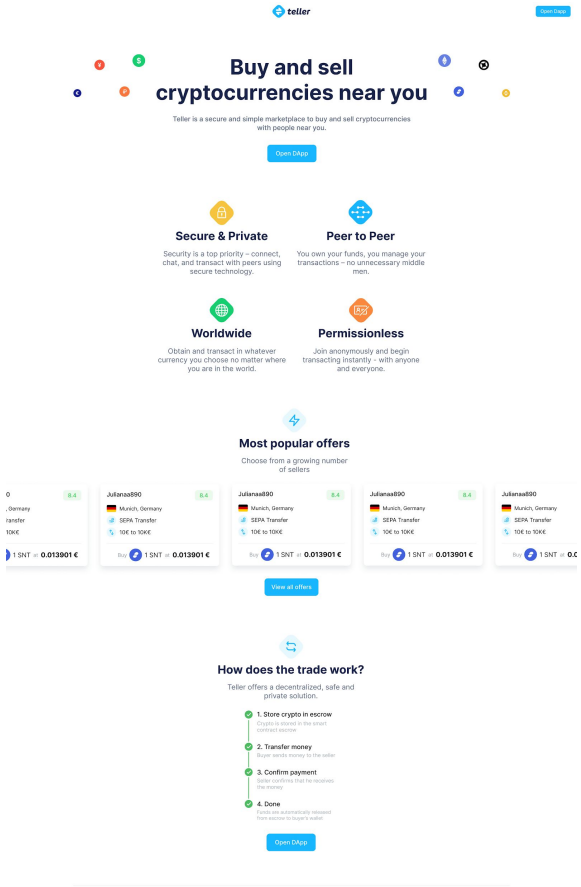
teller

status

# the status network

## teller.exchange

- Live at https://teller.exchange
  - Experimental, keep trading funds limited



# Embark

status

# Embark

- **Embark 5.0 released!**
- **Embark 5.1 coming (very) soon**
  - New directive for interfaces and libraries configuration
  - Support for new types of plugins
  - Support controlling EVM client version in the tests
- **Nightlies system (thanks Michael!)**
  - npm install embark@5.1.0-nightly.0
- **Subspace Version 1.2 coming soon**
  - Support for polling
  - GraphQL Improvements

# Q&A

status

# #status-townhall-questions

**Q1: from @cosmo:**
**How is the Status team organized? Are they a nonprofit? LLC? Just a bunch of geeky friends?**

**Any update on how close they are to solving the scaling?**

**What's the main issue with scaling?**
